## Personal Statement

I'm passionate, energetic and a well organised developer with experience in a variety of engineering positions. I enjoy working in teams and collaborating in delivering meaningful work.

---

## Personal Skills

- I have the ability for being thorough, deliberate and timely, and having attention to detail.
- I do alright in difficult interpersonal situations and at finding ways to effectively resolve disagreements.
- Empathetic, forgiving, supportive, trusting and sensitive to others feelings.
- See my plum test results [here](#).

---

## Work Experience

---

### [Andela](#) / Senior Software Engineer - Platform Team

June 2019 - Present

Part of the team building Andela's internal infrastructure enabling products that interface with multiple departments, employees and partners enabling thousands across our locations work effectively and efficiently.

**Technologies/Skills:** NestJs/NodeJs, Angular, Postgres, NATS, GraphQL, Google Cloud, Microservices

### [Andela](#) / Technical Team Lead

July 2018 - June 2019

Leading a team of entry-level & mid-level software engineers building a product supporting Andela's global recruiting operations that involves building assessment submission and scoring pipelines for thousands of African applicants across our locations, all related metrics analysis & presentation and liaising with the data team piping information into department/company goals tracking dashboards.

**Technologies/Skills:** Ruby on Rails, Coffeescript(/js), Postgres, Google Cloud, Redis, Looker

### [Ralphowino Consulting](#) / Full Stack Developer (Laravel & VueJs)

October 2017 - June 2018

Working with other software consultants on various projects for company partners. Projects were very varying and would have different specs requiring different skills hence a really awesome overall learning experience.

**Technologies/Skills:** Laravel/PHP, Vue js, Electron js, Node js, Docker, Kubernetes, Linux, Redis etc

### [Snaphubr](#) / Full Stack Developer (Ruby on Rails)

October 2017 - April 2018

Working remotely on a Stock Photography sales application as a solo developer. Worked on finding and fixing all bugs, adding new features and overall system optimizations on both backend and frontend.

Technologies: Ruby on rails/Ruby, redis, digitalocean, linux, nginx, slim, amazon-s3.

### [Afghan House App](#) / Scrum Master & Lead Backend

January 2017 - April 2017

Afghan House is an upcoming Kenyan restaurant. I lead the team that built an Android mobile app, admin backend in LAMP stack & Angular, and also allocated team members different roles as a scrum master. The Android app allowed customers to make orders and to track their deliveries while the administration end allows the restaurant to receive, process and manage all orders processed through the app.

**Technologies/Skills:** Android/Java, payments integration, Angular Js, Laravel/PHP

---

## Education

---

### [Moringa School](#) / Moringa Core (Full Stack Pathway)

June 2017 - September 2017

Moringa Core is a 15 weeks full-time course of instruction, and 3 weeks of group project and professional development. This course is for advanced development skills. During the course, Ruby and Javascript were the chosen languages of concentration.

### [eMobilis](#) / MIT Program

Jan 2017 - April 2017

Programming in PHP, CSS, Bootstrap and Java (concentration in Android). Mobile programming in Java and working with REST APIs and AJAX programming. Was awarded two trophies for Best Male and Best Overall student.

---

## Education (other)

---

❖ November 2017

➤ [Machine Learning Course on Coursera by Andrew Ng.](#)

---

## Volunteer Activities

---

❖ December 2017 - Present

- Andela Learning Community Facilitator.
  - Involved helping learners with technical issues, code review, and meetup facilitation
- Angelhack Ambassador
  - Organizing hackathons and building a community!

## Referees

### **Raphael Owino**

Technical Director, Ralphowino Consulting
